[Denise LeAnne Martin-Hastings](#) It's because of you Roger that I did it [change diet] and now I tell everyone about you and your FB page!!!! Such a major difference!!! My diabetic doxie is testing so low for Insulin .....

it's AMAZING!!!! Thank YOU!!!! ♥

[Dee Schwark](#) Thank you so very much for the info Roger. There are so many articles on the net and not knowing if they are biased or not entirely correct is a concern. It's a relief to know that we can rely on your knowledge and honesty. Much appreciated.

[Ali Reitenbaugh-Witt](#) Thank u so much Roger as always I appreciate Ur info and trust your advice !!

[Larry Warren](#) Thank you Roger for all the hard work that you do! It's one thing to say that certain things are not good for our animals and leave it at that, but you back it up with the "why" these are so bad! Thank you

[Uta Harrison](#) Roger, I would like to personally thank you for helping me find a vet. who also is holistically trained [ in addition to conventional vet. school]. Had been there 2 times with Nike [ doggy, will be 11 in Nov.], a wonderful, caring and patient man, price for consultation of ONE HOUR had been only 15,- more as the regular vet. fee [ 90.-]. At the former vet. I had paid 90.- just to get into her office and she had been more than 'indifferent' to my questions about pet food, pointing to the crap she is selling and once I declined she just shrugged her shoulders, turning her back towards me. O.k., that did it, we switched!!! And Molly, the kitten will also get switched over to the new vet. eventually. Never going back to the former vet. again!!! To many misdiagnoses, I do not trust her anymore. --- Thank you so, SO much for providing us with an alternative. P.S. have read your articles and learned so much, you are TOPS!!! I'm so TOTALLY impressed with that Dr., can't thank you ENOUGH Roger Biduk for your help in finding that office.

[Kevin Cronce](#) [Roger](#).. thanks! I like how you describe the reasoning behind why you suggest to avoid. It makes sense. I already do give my pug raw meat in every meal. Mainly was wondering about that food. And now I know what to look for and why I should avoid some and not others.

I don't know if you remember me But I was here asking you about dog food for a diabetic dog. And you recommended a Holistic Vet! Well we had our appointment and a senior panel done and also a fructosamine test! (tests blood sugar over a 3 month period) His Thyroid level was 0.8 and cholesterol 500. Other vet never bothered with this levels. She recommended home cooking bought a cook book and starting cooking for him, She said the raw food wouldn't be good for him, she started him on Thyroid medicine and lowered his insulin by 2 units from 30 twice a day to 28! She wants to do the fructosamine test in 6 weeks to check glucose level! Thank you so much for your help She is Holistic/Western so she does believe in heart worm meds and flea protection. But i have a question what kind of treat would this be protein based treats, for example meat jerkies (ensure they are produced domestically and prudently). I didn't get a chance to ask because we communicated through email! Thanks so much for your help!

[Loraine Sullivan](#) Thanks Roger. I was so glad I had done everything you suggested...I soaked the paw in Epsom salt when she first cut it, I disinfected it and was using an antibiotic on it. What I was doing wrong was not allowing it to air-dry, I was keeping it bandaged. I stopped bandaging it as soon as I read your reply and sure enough the cut started closing up and started healing.

Hey Roger, I just wanted to update you on my dog... I took her to a vet on your list (Bowman Animal Hospital & Cat Clinic in Raleigh, NC, and she changed her diet slowly to a raw food diet, and every lab parameter that was not normal is now getting closer to the normal range! She LOVES her new diet and now has more energy than she used to. I just wish I would have known about this 12 years ago... but at least now, my 3 year old will have the benefit of me knowing! Thanks so much for all your helpful posts! I thank you and my dogs thank you!

Hi Roger, thanks for adding me a while back and as an animal nutritionist myself the job your doing is absolutely fantastic so keep up the trail blazing work as for me when I discovered your site it was like a breath of fresh air, incidentally and if you have time Id be interested see what you think of this UK dog food analysis or self proclaimed "Worlds most comprehensive dog food analysis site" as it has an enormous following and whilst I believe its useful there's quite a lot of info I dont agree with. Anyway, if you get a chance I be interested to hear your opinion. Thanks in advance. [www.whichdogfood.co.uk](http://www.whichdogfood.co.uk)

[Elizabeth Jane Underwood](#) I finally contacted Kindred Spirits on Fort St. and managed to get an appointment with Dr. Allyson Belyea. To make a long story short, it ended costing me \$110 for her to tell us everything you did Roger! We started our cats on their new food a few days ago. They're doing well and we will continue to keep our dog away from those crappy foods. Thanks so much Roger!

[Debbie Daniel](#) awesome

[Elizabeth Jane Underwood](#) Thanks again, and by the way I did tell her about your website. I am so blown away when I think of how we asked our vet if there was another diet we could try he totally dismissed us. Allyson is convinced that we will very quickly need to significantly reduce the amount of insulin we need and very likely be able to reverse the diabetes altogether. Our cats and dog are looking forward to trying your new food when it's out there on the shelves!

Roger Biduk has a wealth of information about dogs & cats and it makes sense to Bruce and me. We are going to start our dogs on a raw meat diet in the next couple of weeks...slowly. In one of his articles, he states that dogs SHOULD BE living up to as much as 25 yrs NOT 10-15 as most of them are. On his site, there are also videos about the "making of dog foods" ..some of them. The site of THIS alone was enough to make me 're-think' what I should be feeding to Nola and Gottie. Thank you Roger!

[Maggie Arnold](#)[Roger Biduk](#)

Roger, the more I read of what you have to say, the more grateful I am, that someone in my GSD group posted your name to friend. I lost my last girl at only the age of 6 - just turned 6 - to a tumor in her spleen. I was devastated! My 16 month old developed allergies, after her first rabies shot and I haven't let them give her a shot since. Between the two, I have been reevaluating everything from diet to vaccinations to neutering. I blame GMOs for losing my last girl. My current girl, as I said in my intro is on raw and I want to make sure I'm doing everything right. The Dog Food Project opened my eyes to a lot! Commercial foods scare the hell out of me, both for myself and my 4 legged babies. I have done a lot of research on what's in commercial foods, and being one of those "health nuts" from the 70s and managing health stores for several years, I don't have a lot of faith in the FDA or vets or doctors, for that matter. Is there a good holistic vet near Toledo, OH? I was checking your list and didn't come across one. Thank you for all you're doing, sharing your knowledge

[Brenda Duggan](#) posted to [Roger Biduk](#)

Roger... like you said better late than never! I headed out and got my lab 10 new cans of beef & turkey stews Wellness. I also got the yogurt, banana & apple wellness treats that I used to give him years ago. He LOVES them. He also just gobbled down a few mouth fulls of the weight management Wellness core dry. So it appears we are off to a good start. Calling Mark Russo at Kingston Vet tomorrow. Can't wait to get an appointment with him. My dog "Tahoe" thanks you too!!!

Thanks for all the wonderful info. Thanks for the endorsement Roger. I really appreciate it. You did miss one. There are 7 books available, and I'm working on a new one now. Please let me know when you have your own label. Our babies are so important to us and we want to feed them only the best. [Roger Biduk](#) My pleasure...

[Kim Spensley](#) My girl Tierra got sick from her vaccinations. She lived with autoimmune issues for 8 of her 14 years and in the end died from bone cancer. I TOTALLY agree with this article.

[Charles Raywood](#) Well said [Roger Biduk](#)

[Dabid Chua](#) hi sir roger , im thinking of.. i will make you one of the moderator of my cat group exotic shorthair cat philippines. you can write or make your own file in the notes. what can you say? btw are you a filipino? [EXOTIC SHORTHAIK CAT PHILIPPINES](#)

[Shaman'a Ital JahRoot](#) Give thanks for the EMPIRICAL and Forward TRUTH; I've been teaching this for twenty (20) YEARS. That "kibble" is unhealthy. NO DOG, NO WOLF ever descended on Kibble. They ate wild foods, scavenger foods, organ meats, and they knew to eat greens to heal themselves, also tree barks. Immunizations can be a help ONCE in the dogs' life. The Bordatella is a complete waste of immunity and time! I never give them and I have boarded with permission from kennels that know it's 'hype'. This is BIG BUSINESS FOLKS! I ask my clients as a Shaman who works with ENERGY and Whole FOODS for hue mons and companions animals that are not "owned" to seek wellness and balance with indigenous ways. The number of Veterinarians that have dismissed my ways with statements like: "Your dog may break a tooth..." is "appeal to fear." Fortunately, I have a former career in law for over 18 years so I bring a tremendous professional background into my practice. I am thankful for the works that you bring to this page! THANK YOU!

Thank you for putting that out there Roger. I believe in supporting the immune system, not attacking it. This is really good to see.

[Roger Biduk](#) Are you happy with these holistic vets and their approach to Cowboy's problems?

[Rhonda Joines](#) So far she has been wonderful.....calls everyday to check on him.....that i appreciate so very much.....and with Dr. Raditic and her husband both working on his case I feel like he is getting the best care that is around here.....Thank you so much [Roger Biduk](#) for sending me and my sweet cowboy to her!!!

She not only does holistic vet.... She does acupuncture, chiropractic and conventional medicine.... She is truly one awesome person.

[Roger Biduk](#) Good vets like her and her husband do exactly that.. that's why everyone should be working with a holistic vet... must have said that 600 times already on FB and people still don't get it...

[Rhonda Joines](#) yeah I think you have told me a few times truth is unless you go to a holistic vet you don't know or see the difference.....that is for me anyway.....I see a BIG difference.

I had been reading Roger's site for a short time and figured he deserved some recognition, so I sent him this message...

"Hey Roger,

I just wanted to say that I love your website and have learned a lot from reading it. I work as a dog nutritionist myself and have been doing so for the past couple of years. I am also getting ready to start taking courses needed to apply to vet schools eventually. Keep up the good work!

[Rhonda Joines](#) Roger, I just wanted to let you know that I finally got intouch with Dr. Raditic and Cowboy has an appointment with on Monday at 9:00am.....wish us luck and thank you so much.....

[Patsy Breslin](#) I am going raw with my dog now, thank you for all the information,

[Alex Abbott](#) Just posted my question on your wall.. thanks for the help.. I am learning so much from you and your site!

[Uta Harrison](#) OMG, thank you Rodger!!!

Roger, I opened a small pet shop February 16th in Massachusetts with the following mission statement: healthy, holistic, chemical-free, by-product free, meal free, grain-free, locally or US sourced and made products. I use your article as a reference to why people should not feed their pets grain even the rice vets tell people is so wonderful. Thanks for your article.

[Shaman'a Ital JahRoot](#) Roger! I just got to your website! VERY nice, love the works!

Read up on Roger Biduk's insightful post on this dangerous ingredient. It's not just in pet food!

Im glad there is someone I can contact personally to help out. Ive been making raw food for my cats for awhile now and knowing kuwait with this lack of animal awareness and care I decided to do do something about it and make a chance. Ive been in business for about a year or so making homemade monthly meals for cats and dogs plus treats and snacks. However, im pretty sure there are things I need to readjust and lack ths knowledge of it.

Change\*

Im also working in the society here I. When I first started they had zero knowledge about raw food or dangers in commercial food and were against the whole concept but that God ive changed that! I have been educating them in every aspect of care and health and now they are more interested in knowing the companies they have been using whether they are good or not! That's my new project atm

Sorry im tlking a lot but im very excited lol

thank yu soooo much for posting articles like these.we have to spread this around for sure.I know I will do my part,because I put my life on the line for all animals.if only we could walk in their paws and see what life is like eh?

[Angie Roberts](#) So nice to hear someone talking good sense! Thank you for the information about heart worm, I shall read it with interest. I would not put toxic chemicals into or on our beloved dogs either. [Dog Owners / Breeders Should Need A License !!](#)

oh..Roger!..that was very well put!

I have also read those articles you mentioned. They are very good and I was quite comfortable with the amount of information they provided. Instead of trying to hide anything; Champion has always been upfront and willing to correct and fix any mistakes it has made. After all...aren't we all human??

Trying to find a dog food that met my dogs needs was not easy nor did I take it lightly. I researched a long time before I found Orijen to be one of the best in the dog food industry. I was considering going raw but with my health and budget it just wasn't as feasible as I had hoped. I had even called the company to ask a lot of questions and they were very accommodating.

It angers me so much when someone who is so little educated or is too lazy to spend the time to get their facts straight/right would make such outlandish comments. I want to THANK YOU for setting the record and backing it up with the links. Your time is greatly appreciated in this matter. God Bless!..and my dogs say..woof, woof!

please add me as a friend. I have 5 cats and post a lot for dogs and cats. You seem to be up on what is going on.

thks for your advise and showing us out here a different approach to some things - yes information here is hard to get yes often we cant get what we want but hey as a new dog owner getting some guidance on good reference info is a good thing - thank you - one more question if I may to save some hours of reading - is it an okay thing to feed your dog rice? FYI sometime we can get brown rice here other times we can not all the luck of the shopping day.

[Rhonda Joines](#)

Roger I have been reading your post.....very interesting.....I do not give my dogs heart meds.....what is your advice on vaccines.....if you have any suggestions at all on what would be best for my sweet cowboy.... I am seriously begging for your assistance in any way form or fashion.....i love my dogs with all my heart and never want them to suffer in any way

Hello I am a small time breeder in my home and al, the dog food recalls and complaints have got me worried. I use Nutro Ultra puppy. Now I am very worried. The more I read the more confused I get. What should I be buying. Thanks in advance for your help. I breed Shih Tzu's AKC/DNA champion bloodlines. My pets are my babies that I breed.

[Octavio Cavazos](#) thank you so much for such valuable information, roger!! this is a topic thats been worrying me for a while and now i feel like im more informed and prepared

Thanks for adding me, Roger! I've been enjoying your great posts regarding nutrition. My 5 year old spayed female Newfie has just been diagnosed with her 4th UTI in 8 months (post CCL repair.) Her vet saw struvite crystals in her specimen this time around and wants me to start her on Royal Canin SO or Hills U/D prescription. I've asked to treat her with cranberry and ester-C to acidify her urine, increased fluids by way of adding broth to her Orijen instead of just plain tap water for 10 days to flush, since her pH was 8 and her urine was very concentrated. I'd appreciate any thoughts you have on prescription diets.

Thank-you for your information.

I am getting a Great Dane puppy, at 8 weeks of age, this week. I have heard that they have special dietary needs. What would you recommend that I feed her? She is currently on Wellness Adult food.

[Melony Honeycutt](#) *posted to* [Roger Biduk](#)

I am wanting to start feeding a raw diet but don't really want to do it myself as I have very little free time to prepare. Is there a good quality raw diet that is already prepared and frozen? What companies are reputable for these raw diets that I could trust to order from? Thanks so much, your info has been very helpful.
